

## CURRICULUM VITAE

### **Personal data:**

*Full name:* **Andrey V. Popov**

*Date of birth:* 25.09.1986

*Place of birth:* Leningrad, USSR

*Address:* 138 Moskovsky av., 196084, Saint-Petersburg, Russia, flat 15.

### **Education and career:**

Entered the Geographical faculty of Saint-Petersburg State University in 2003 as the student of night half-time tuition department, but then in 2004, in view of his excellent results, was moved up into the 2<sup>nd</sup> form of full-time tuition and entered Climatology and Environment Monitoring department. Successfully passed his exams on all the disciplines and practices in time and never had any failed examinations.

In 2008 successfully defended his specialist degree work called “Hydrometeorological Factors Influences on Salmo Salar North-Atlantic Salmon on Kola Peninsula in the Aspects of Applied Climatology”, which showed the results of re-processing his previous yearly works on the same topic. A scientific article based on this work results is prepared for “University Bulletin”. (“Vestnik SPbGU”).

The same year graduated with honours degree and in the autumn was accepted as the student of magistracy at the same faculty with the master’s hydrometeorological programme “Climatology”. Additionally studying at “Translator in the Sphere of Professional Communication” programme at philological faculty of our University. In this October made an application for taking part in “Geographical Education and Science in Russia: History and Contemporary Conditions” international scientific practice conference, which is to take place December, 3<sup>rd</sup> and 4<sup>th</sup> at the Geographical faculty of Saint-Petersburg State University. Before took part in several scientific conferences and seminars as a listening student.
